- 27 APR 1960
1. Attached is a portion of the 1960-1965 section of the East German Seven-Year Plan for the VVB Aircraft Construction (Flugzeugbau) which was drawn up by the East German State Planning Commission on 1 October 1959. This portion of the plan includes basic data on planned exports, investments, labor force, labor productivity and production cost reductions for each year of the plan period.)
 2. The plan shows that investments in VVB Flugzeugbau will taper off steadily over the plan period going from 85 million DME in 1960 to 35 million DME in 1965. 6 MAY 1960
 3. The export section of the attached plan only lists gliders under the most important products. This is obviously an incomplete listing because the quantity of such planes remains at 50 per year during the plan period, whereas the overall value of products exported by VVB Flugzeugbau considerably increases during the same period.
